

STEPS ON HOW TO IMPORT DATABASE USING XAMPP

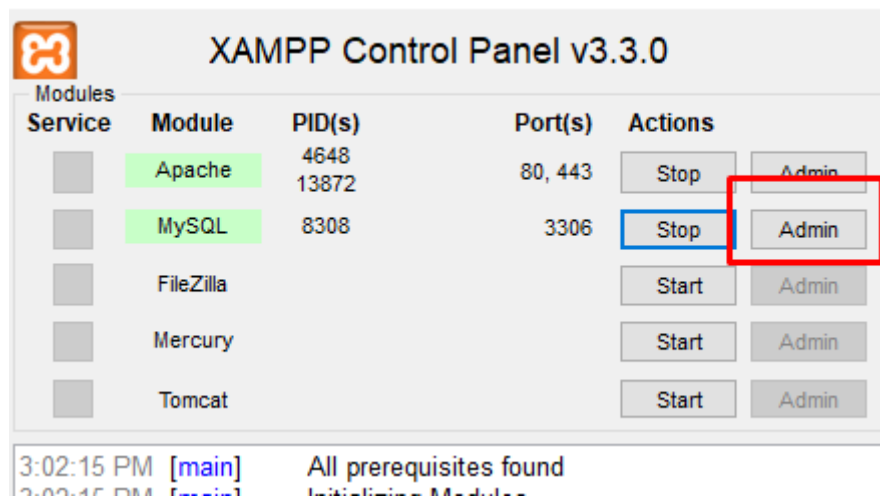

- 1) Put your website folder into "C:\xampp\htdocs"

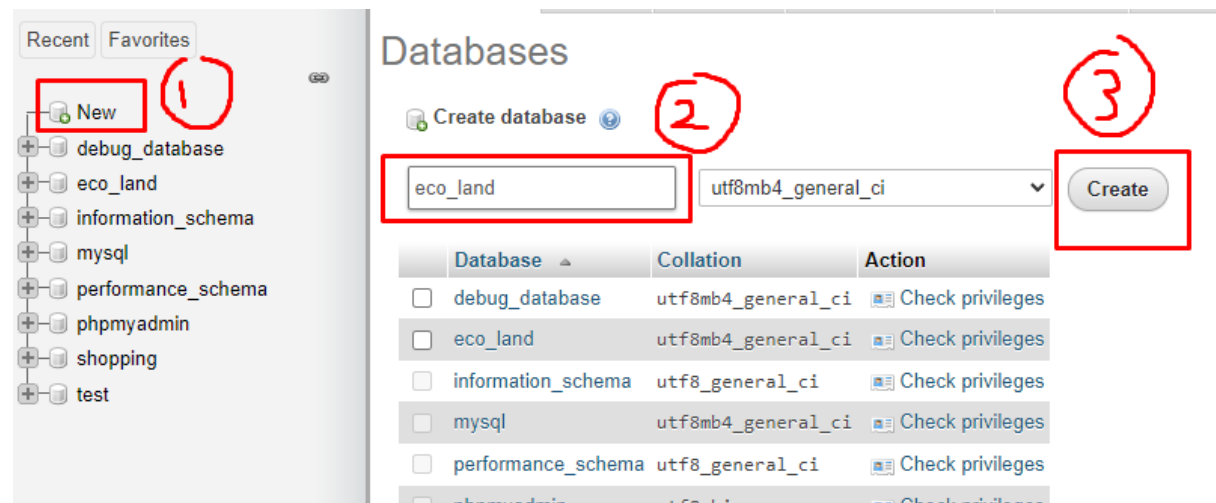

- 2) Open your XAMPP control panel and start Apache and MySQL

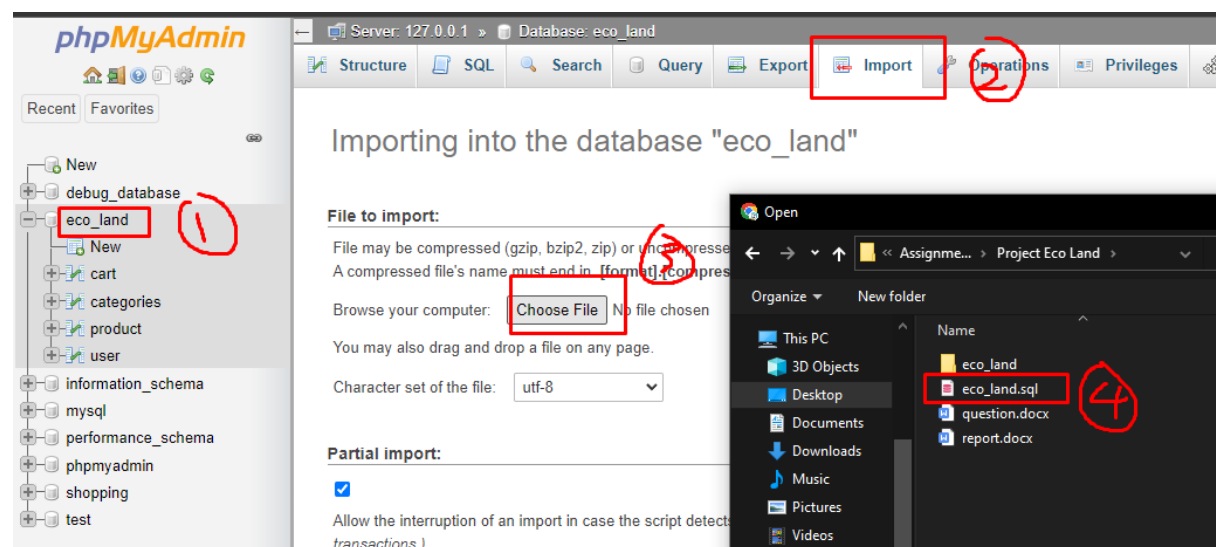

- 3) Click the “Admin” button on the MySQL Section

- 4) On the phpMyAdmin, click “New” -> Enter Database Name -> “Create”

- 5) Select your database and click “Import” -> “Choose File” -> Select your database -> GO. **The go button is on the bottom right**

- 6) To enter your website, in the URL, type localhost/*your_website_folder*/, like the picture below
